SCENE STEALER

An arresting black steel island makes maximum graphic impact in this kitchen.

INTERIOR DESIGNER SHAREEM JOEL OF SHAREEM JOEL DESIGN
DESIGN "This project plays with materials and surfaces, most notably the white interior space and the contrasting black steel and stone. The refined detailing adds interest and the oak herringbone floors add texture. Juxtaposing stark modern materials and an arresting black steel island bench, the design is sympathetic to this grand Georgian home's exterior."
